## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, 18-19, drawn to an exposure apparatus and corresponding method having a light absorber disposed on the wafer stage for preventing thermal distortion of the unit, classified in class 355, subclass 30.
  - II. Claims 8-17 and 20, drawn to an exposure apparatus and corresponding method having a window, a shaping optical system and a light receiving plate, classified in class 355, subclass 67.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-II have separate utilities such as providing an exposure apparatus capable of operating without the effects of thermal expansion of the wafer stage and providing an exposure apparatus capable of operating while preventing contamination around the wafer stage from being affected by heating due to exposure processing . See MPEP § 806.05(d).

Art Unit: 2851

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung Henry V. Nguyen whose telephone number is 571-272-2124. The examiner can normally be reached on Monday-Friday (First Friday off).
